# POC FINDINGS

Octane Obit | Octane vs FDC reconciliation, Petrocity Bonje

**Test site**

**Petrocity Bonje**
23 Sep to 27 Oct 2026 (35 days)
Diesel and petrol

**Prepared by**

**Summit Surds Ltd.**
Octane Obit | Forecourt & Fuel Management
29 October 2026

## Result

Octane matched the FDC exactly on 31 of 35 days. Where they differ, Octane is missing transactions the FDC recorded. It never records different amounts.

| Fuel | FDC (L) | Octane (L) | Octane captured |
|---|---|---|---|
| **Diesel** | 655,415.9 | 637,281.8 | **97.2%** |
| **Petrol** | 33,597.4 | 32,990.8 | **98.2%** |

Excluding the first day (23 Sep), Octane captured 99.7% of diesel and 99.6% of petrol.

## Days that did not match

| Date / window | Fuel | FDC (L) | Octane (L) | FDC minus Octane (L) | Note |
|---|---|---|---|---|---|
| 23 Sep, full day | Diesel | 28,151.68 | 11,790.08 | 16,361.60 | POC start-up day: set-up was still being completed after the kick-off meeting. The rest of the day's data is still on the FDC. Fixing the FDC's FTP upload speed will bring it into Octane |
| 23 Sep, full day | Petrol | 1,005.31 | 522.94 | 482.37 | Same cause. The data is still on the FDC |
| 30 Sep 16:45 to 1 Oct 07:30 | Diesel | 25,816.62 | 24,044.09 | 1,772.53 | A disconnect left these transactions on the FDC. The data is still there. Fixing the FDC's FTP upload speed will bring it into Octane |
| 30 Sep 16:45 to 1 Oct 07:30 | Petrol | 1,522.54 | 1,403.82 | 118.72 | Same window. The data is still on the FDC |
| 3 Oct | Petrol | 947.08 | 941.08 | 6.00 | Single small difference |
| 30 Sep 07:30 to 16:45 | Petrol | 517.88 | 518.36 | -0.48 | Octane marginally higher; rounding level |

## Why the differences happen

The differences are transactions that had not reached Octane yet. The FDC sends its data slowly, about one batch every 3 minutes, so transactions can queue for hours when the station is busy.

## How to fix it

1. **ROHE:** increase the FDC's upload speed, or allow larger batches.
2. **Octane:** once the backlog is cleared and the upload speed is increased, the transactions still stored on the FDC will reach Octane automatically, and Octane will reconcile with them.
3. **Both:** align on how data is uploaded when there is a backlog, so real-time forecourt activity stays up to date.

**Once the upload speed is fixed and the backlog is cleared, Octane should match the FDC 100% every day.**
